

Dear author,

we are taking some effort to produce a coherent layout of the abstracts for our 2024 Annual meeting. Therefore, it is important that you do not change the format parameters of the template.

Please use the definitions "*TheTitle*", "*TheAuthors*", "*TheAffiliations*" and "*TheContact*" to enter the title of your abstract, the author names and affiliations and the corresponding author's e-mail address by replacing the placeholder text in the definitions with your entries.

In the definition "*TheAuthors*", you can delete or add author names as required using the same notation. The presenting author shall be listed first, in bold-faced letters.

In the definition "*TheAffiliations*", you may delete or add new lines corresponding to the number of affiliations required. Please make sure, there is a line break after the last entry.

We confirmed that *.jpg and *.png graphics are supported. PDF-graphics are not supported.

We assume that you should be able to use the template without installing additional packages. However, if this should be the necessary, all the required packages are readily available from the usual repositories.

Finally, please make sure that your abstract fits on one page and the resulting PDF is not larger than 20 MB.

Kind regards from the organizers
