

Annual Meeting 2024

Dear author,

we are taking some effort to produce a coherent layout of the abstracts for our 2024 Annual meeting. It is thus important that you do not change the format parameters of the template.

Please just replace the placeholder texts (displayed in red) with your entries ensuring that the format of the actual paragraph doesn't change. If you have to re-format text, please use the built-in templates. Their names should be self explaining.

Please make sure to set the font colour of the entire document to black after you are finished with your replacements.

You may delete or add author names as required using the same notation and formats as in the template. The presenting author shall be listed first, in bold-faced letters.

In the affiliations section you may delete or add new lines corresponding to the number of affiliations required.

Graphics should be centred.

You have to convert your document to PDF since this is the only file format, which is accepted by the submission page.

Finally, please make sure that your abstract fits on one page and the resulting PDF is not larger than 20 MB.

Kind regards from the organizers
